

What is a switchgear?

A switchgear is a facility in which electrical energy is distributed. We use switchgear from well-known manufacturers as a component in our transformer stations, transfer stations without transformers or in switching rooms. We are your contact, no matter if it is about a medium-voltage or low-voltage switchgear!

Where does the low voltage switchgear come from?

Low-voltage switchgear installed by us comes from our partner company Kautz Starkstrom-Anlagen GmbH in Trier. The individually designed low-voltage switchgear from 630 A to 6300 A is arc fault tested. Compliance with DIN EN 61439 is documented in the design verification.

What types of insulated switchgear do you offer?

We offer 10 kV and 20 kV air or SF₆ insulated switchgear. Additions, extensions and conversions as well as special designs up to 36 kV are also part of our range of services. In addition, we supply compact and walk-in transformer stations - individually according to your needs.

Who installs SF₆ insulated switchgear?

Depending on your individual wishes and technical requirements, we plan, deliver and install your SF₆-insulated switchgear. Low-voltage switchgear installed by us comes from our partner company Kautz Starkstrom-Anlagen GmbH in Trier. The individually designed low-voltage switchgear from 630 A to 6300 A is arc fault tested.

Explore a wide range of our 1200A Switchgear selection. Find top brands, exclusive offers, and unbeatable prices on eBay. Shop now for fast shipping and easy returns!

Locate Panelboards and Switchgear suppliers, manufacturers & distributors in Germany. Interactive map of Germany provided.

Your professional partner for electrical engineering in the fields of automation, switchgear construction, and project planning. In addition to the latest technology, we also place great...

The Panel Design allows for main breaker to main lug conversion, interior densities rated for up to 1200 amps, and allows for the flexibility to customize branch circuits, while minimizing the complexity of ...

As a German switchgear manufacturer, we plan, manufacture and install a wide variety of switchgear. All switchgear offered by SZM, no matter if air insulated or gas insulated, are SF₆-free.

The Würth Group is divided into two operational units: The Würth Line focuses on the production and sale of assembly and fastening materials for customers in trade and industry.

We manufacture 1200 amp switchgear with fast nationwide shipping and 24-hour service support. Built for

Wholesale 1200 amp switchgear in Germany

safety, durability, and performance in outdoor electrical distribution -- trusted by engineers, ...

When exploring the switchgear industry in Germany, several key considerations come to the forefront. Firstly, compliance with stringent European Union regulations and standards is essential.

Are you looking for a qualified partner who produces state-of-the-art control- and automation systems? 40 years experience in the market and a qualified, highly committed expert team make us the ideal ...

Low-voltage switchgear installed by us comes from our partner company Kautz Starkstrom-Anlagen GmbH in Trier. The individually designed low-voltage switchgear from 630 A to 6300 A is arc fault ...
