

# Why did Tesla cancel photovoltaic panels

Is Tesla phasing out its solar business?

In 2023, we reported that Tesla began phasing out its solar business, particularly its in-house installations. Tesla shifted its focus on deploying Powerwalls and solar inverters through third-party installers. The same thing is happening with Tesla's solar roof tiles.

Does Tesla have a solar problem?

In fact, the bigger picture is that Tesla's annual solar deployments were at their highest in 2016 when it acquired SolarCity - and they were higher still at SolarCity the year before that. In its 2023 Q4 report, Tesla put its solar woes down to broader "downward pressure on solar demand", an argument that's not without merit.

Is Tesla's solar business declining?

Tesla's solar business is in decline, according to the latest figures from its earnings report. The automaker revealed on Wednesday that its solar deployments cratered by 36% to 223 megawatts (MW) last year, down from 348 MW in 2022.

What's happening with Tesla's Solar Roof?

What's happening with Tesla's solar roof? The Tesla Solar Roof tiles are still alive, but the product is on the back burner at Tesla as it failed to achieve its promises.

To be fair, there are a few reasons why Tesla might want to offer a nuanced view of its once-vaunted solar business. Across the solar industry, the bloom is well and truly off the rose.

Tesla aimed for the solution to be competitive with higher-end roofing options, but it remains expensive and much less affordable than many durable roof options, plus solar panels.

Tesla Solar Sales Declined for 4 Straight Quarters, Then Tesla Stopped Publishing the Numbers

In 2017, shortly after acquiring the solar division from SolarCity, Tesla was installing about 200 megawatts of solar panels per quarter. By 2018, it was averaging around 85 megawatts, and the ...

So, did Tesla give up on solar energy? Well, no, not really. In fact, in just the past year, Tesla has published four high-production marketing videos on their account, featuring ...

Tesla purchased SolarCity, a large solar and backup installer, back in 2016 and shortly thereafter began installing its unique Tesla Solar Roof, regular Tesla Solar panels, and Tesla ...

So why would Tesla make the announcement to cancel many solar projects in some markets, even some that have already begun? In Q3, Tesla decided to stop scheduling solar roof ...
