

Will the state purchase solar power

Are solar power purchase agreements a good idea?

Across the United States, developers and hosts/customers are using power purchase agreements (PPAs) to finance solar energy projects. In fact, PPAs have been a big contributor to the staggering growth of the solar sector over the past decade.

Can I buy solar energy through a PPA?

You can write a letter to your state energy office or organization stating why homeowners residing in your state could benefit from having the option of buying renewable energy through a PPA. In some states, leasing solar panels may be an option where PPAs are not. Leases are very similar to PPAs, but differ in what you pay for.

Are power purchase agreements available in all states?

But, because the energy policy around PPAs is determined and handled at the state level, they aren't available in every state. Let's look closer at what exactly is a power purchase agreement, and which states have them available for homeowners.

Who owns solar power?

The ultimate owner of the SRECs owns the "solar-ness" of the power. Many states create SREC markets to spur the development of solar by requiring electricity suppliers to purchase SRECs produced by in-state solar systems as part of their obligation under the state's Renewable Portfolio Standard (RPS).
